

Founder of Revolight AB

Kalilou Diaby

kalilou@revolight.io - +46733262575
Solna, Stockholms län - Sweden

**Married and family of four members, me, my wife
and two lovely daughters aged respectively 4 and 2 year.**

Sr. software and Infrastructure/DevOps engineer with a strong backend focus and advanced skills in leading-edge programming tools in conjunction with the ability to familiarize, assimilate and dive into new technologies. Kalilou has a lot of experience in the various steps of building an application, everything from creating an IT architecture to the actual implementation. His way of working is characterised by deep commitment and a goal and solution oriented mindset. He is particularly strong when working towards predefined goals and deadlines, preferably in heterogeneous groups where he can take a lot of responsibility and initiative. He is also eager to learn new things, even if it isn't related to the specific focus area of his work

EXPERIENCE

DevOps Engineer & Strategist
Cloud Strategist & Architect
Cloud Developer
Cloud Governance
Infrastructure Architect
Automation Engineer
CI/CD Engineer
FullStack Developer
Backend Developer

COMPETENCE

DevOps, Cloud architecture,
Cloud migration, Automation,
Software development, Cloud
infrastructure, CI/CD, Database
Administration,
Software Design and
Architecture
Quality Assurance
Systems Administration
Systems Integration

INDUSTRY EXPERIENCES

Telecom, Media
e-commerce
Public Sector, transportation
Energy, Game

LANGUAGES/ FRAMEWORKS

Python, Ruby, Go, C/C++,
Java, .Net, Pyramid, Flask
J2EE, JavaScript, Angular,
React, SQL, SpringBoot, Requir
eJS, Bootstrap, Jinja2, Bash.

LANGUAGES

French, English, Swedish

DOCKER ORCHESTRATION

Kubernetes, Azure AKS, AWS EKS,
Google GKE, Swarm, Docker
Compose.

SERVER CONFIGURATION MANAGEMENT

Chef, Puppet, SaltStack, Ansible,
AWS OpsWork, Azure Automation
State Management.

CONFIGURATION MANAGEMENT

GIT, BitBucket, GitLab, Perforce,
Stash, Azure DevOps, Jenkins,
Teamcity, Bamboo, Travis.

DATABASES

PostgreSQL, Oracle, MySQL,
MariaDB, MSSQL, SQLite,
CouchDB, DocumentDB,
MongoDB, Amazon RDS,
Cassandra, Amazon DynamoDB,
Redis

TESTING

Gatling, Jmeter, Cucumber, Lettuce,
Capybara, Nosetests, JUnit,
Selenium.

CLOUD

Amazon Web Services (AWS), Microsoft
Azure, Google Cloud Platform (GCP),
VMware Cluster (Vsphere)

OTHER

Docker, Spinnaker, LetsEncrypt, easy-rsa,
Github, BitBucket, Gitlab, Jira,
Confluence, Stash, OpenVpn, Vagrant,
Packer, Nomad, Vault, Perforce, Kanban,
Scrum

INFRASTRUCTURE As CODE

Terraform, Azure ARM template, AWS
CloudFormation, Ansible.

EDUCATION

Computer Sciences, Stockholm University

CERTIFICATION

AWS Solution Architect - Associate
AWS DevOps - Professional
AWS Developer - Associate
AWS SysOps Administrator - Associate

ENTERPRISE ARCHITECTURE

TOGAF, ArchiMate, Zachman

Selection of qualifications

Cloud Governance & Strategist /Project Owner

SINCH AB - STOCKHOLM NOV 2020 - PRESENT

Sinch AB is a cloud-based, mobile communications platform that provides companies with Voice, Verification, Video, SMS capabilities.

Kalilou is taking part of Sinch AB reorganization process, Sinch has been acquiring multiple companies over the years and this reorganization is about taking an important leap into unified all Sinch Companies as a whole. As first, Kalilou is laying out a plan to centralize and unify all cloud providers including AWS, GCP and Azure in terms governance, compliance and security.

Kalilou is also working on a roadmap for next year Q1 and Q2 regarding all aspects/processes of centralized governance of all those cloud accounts.

In parallel to the new responsibility, Kalilou as project owner for the onpremise migration to the cloud, Kalilou is making sure the last milestone of the onpremise service is migrated by Q3 next year.

TECHNOLOGIES: AWS, GCP, Azure, DevOps principles, Kubernetes, Saltstack, Jira, Scrum, Octopus, TeamCity, Git, Terraform, Elasticsearch, Datadog, OP5, Grafana, ISO27001, Docker, Docker Swarm, Docker Compose, Dell iDRAC monitoring, SNMP, Python, Cassandra, Logstash, Filebeat, Python.

Project Owner/Technical Lead

SINCH AB - STOCKHOLM JAN 2020 - OCT 2020

Sinch AB is a cloud-based, mobile communications platform that provides companies with Voice, Verification, Video, SMS capabilities.

Kalilou joins as consultant for helping achieve the different OKR (Objectives and Keys Results) set as the company level goals. Those OKRs involve system stability, Sinch ISO 27001 certification and a complete migration of Sinch AB onpremise to AWS.

With Kalilou help, Sinch is now ISO 27001 certified and Sinch has now a stable unified, stable, resilient and centralized logging system which underwent a complete re-architecturing. At the moment Kalilou as the owner of the migration to AWS project is supervising, planning and executing the implementation of the different tasks of the migration.

Ongoing project.

TECHNOLOGIES: AWS, Saltstack, Jira, Scrum, Octopus, TeamCity, Git, Terraform, Elasticsearch, Datadog, OP5, Grafana, ISO27001, Docker, Docker Swarm, Docker Compose, Dell iDRAC monitoring, SNMP, Python, Cassandra, Logstash, Filebeat, Python.

LEAD DEVOPS & CLOUD ENGINEER

STOCKHOLMS LOKALTRAFIK (SL) - STOCKHOLM SEP 2018 - DEC 2019

SL works to offer affordable public transport with good capacity and quality in the Stockholm region. They work to propose and implement regional public transport solutions to facilitate commuting and simplify everyday life for everyone in the Stockholm region. SL is building a new ticketing system platform based on the modern principle in mind.

Kalilou joins SL as DevOps/Cloud Engineer and is responsible for SL cloud adoption roadmap. With Kalilou help SL has a stable cloud architecture with security, scalability, flexibility, reliability, availability and cost optimisation in mind. Kalilou has been in the front line setting up the entire automation, monitoring, logging, CI/CD and security compliance at SL. Thanks to Kalilou SL now has started with the DevOps cultural transformation within the team and within the entire organisation. With Kalilou's contribution SL now has dockerized all applications which now run on kubernetes in the Cloud and SL can now perform a rolling deploy within 10 minutes compared to weeks taken to deploy on premise prior to him joining SL.

TECHNOLOGIES: Jenkins (pipeline), Bamboo, Kubernetes, Docker, DevOps cultural transformation, AWS, Artifactory, Maven, Java SpringBoot, Ansible, Gradle, Sonar, MySQL NDB cluster, F5 loadbalancer, Grafana, Kibana, LetsEncrypt, Prometheus, PostgreSQL, Terraform, Python, NBD backup/restore, ElasticSearch, Hashicorp Vault (secret management), Java, Node.js, CentOS 7, C/C++.

DEVOPS ENGINEER & SUPPORT

KFZTEILE24 GMBH - BERLIN JUL 2018 - AUG 2018

Kfzteile24 is an international webshop for all kinds of car parts. The online shop is one of the biggest of its kind and the market leader for car parts in Germany.

Kalilou joined Kfzteile24 for a firefighting mission of two weeks to help Kfzteile24 with their automation, logging, monitoring, CI/CD so they can meet their deadline to release their product in the Austrian Market.

Kalilou supports the team with related DevOps topics/questions within AWS.

TECHNOLOGIES: AWS, Prometheus, Grafana, Docker, AWS Fargate, AWS CodePipeline, AWS CodeCommit, RabbitMQ, Gopass

LEAD CLOUD STRATEGIST - AWS BEST PRACTICE

SINCH AB - STOCKHOLM JAN 2018 - MAY 2018

Sinch AB is a cloud-based, mobile communications platform that provides companies with Voice, Verification, Video, SMS capabilities. Sinch in their migration journey to AWS, Sinch became aware of the importance of

AWS best practices to be implemented. The project consists of designing and implementing AWS best practices.

Kalilou helps design and implement best practices around security, compliances and cost optimisation. Kalilou has designed and implemented best practices for Sinch AWS Identity Access Management. Kalilou also helps Sinch establish their cloud resources compliances which gives Sinch a proactive approach to mitigate all resources not meeting the compliance requirements.

Kalilou was a Sinch AB GDPR representative within the CLX organisation committee and helped Sinch become GDPR compliant by setting process in place with regards to the GDPR articles. Aside from being cloud strategist, Kalilou helps migrating by rewriting all Sinch on premise hardware monitoring to DataDog. He also helps save cost by 100% by implementing Sinch ElasticSearch security as well as fully automating ElasticSearch clusters using SaltStack.

TECHNOLOGIES: AWS, Saltstack, TeamCity, Git, Terraform, Elasticsearch, Datadog, OP5, Grafana, GDPR, Docker, Docker Swarm, Docker Compose, Dell iDRAC monitoring, SNMP, Python, Cassandra

LEAD DEVOPS ENGINEER

STARSTABLE - STOCKHOLM AUG 2017 - SEPT 2017

StarStable is an online 3D game world built specially for those with a passion for horses and adventure. It is an MMORPG (Massively Multiplayer Online Role Playing Game) with over 6 million users in 182 countries. StarStable was moving away from an old traditional build system which was taking more time and involving considerable human manual interaction. The project consists of building a new CI/CD tool with modern principles in mind which will reduce build/deployment time as well as remove all human interaction.

Kalilou joined the project as a senior DevOps engineer and was responsible for setting up the new build environment from scratch which involved first automating the environment in AWS as infrastructure as code (Jenkins master, Jenkins agents, setting up Jenkins data daily backup, monitoring, restoring backup, creating AWS EC2 AMI created through code). Once that was done, Kalilou moved on to the second step which was to migrate all build jobs from the old build environment to the new Jenkins. Kalilou has setup the Jenkins shared library which allows in the Jenkins file to call the predefined steps provided by the shared library.

TECHNOLOGIES: C/C++, CMake, Python, AWS Services, Jenkins, Perforce, Troposphere, AWS, Groovy. Centos 7, Git, Windows Server, Confluence, Jira, MacOX build environment.

LEAD DEVOPS & CLOUD STRATEGIST & EDUCATOR

FORTUM - STOCKHOLM NOV 2016 - AUG 2017

Fortum is a leading clean-energy company developing and offering solutions for their customers in electricity, heating, cooling, as well as solutions to improve resource efficiency. They provide services for the power generation industry and solutions for consumers so that they can be smarter in their energy choices.

Kalilou joined Fortum IoT as senior DevOps lead engineer and cloud lead strategist. Kalilou was overseeing all aspects of the DevOps and Cloud adoption. The project consisted of establishing an accelerated roadmap for their cloud adoption as well as fully migrating all on- premise applications to the cloud.

Kalilou as cloud lead engineer helped Fortum IoT (Fortum Tingcore former name) established an accelerated cloud adoption roadmap which consists of determining an estimated cost of cloud resources required, designing and implementing the AWS architecture based on resiliency, security, scalability, availability, reliability, flexibility and cost optimisation). Kalilou made sure all resources in AWS are created/managed in an automated manner. Kalilou was responsible for setting up in place a knowledge sharing strategy through workshops involving all teams extending their knowledge on the AWS cloud platform.

Migrating all on premise application to the cloud required having in place a modern CI/CD tool. Kalilou helps setup Jenkins which was also automated through infrastructure as code. Jenkins as CI/CD was setup with a modern process in mind by making use of the Jenkins pipelines. Kalilou started off writing a shared library which contains reusable steps which in turn allows developers to write their own Jenkins files in a more flexible way by using the reusable steps or extending them.

Kalilou was leading the knowledge sharing within the team by holding workshops. Kalilou helps educate and assist the remote site team on how to dockerized the on premise applications as well as how to write the Jenkins files for deploying their application to the cloud. Kalilou was actively involved in Fortum potential candidate interviews as well as employees on-boarding. Kalilou helps refactored a number of on premise applications for the cloud migration which were not adapted to the cloud.

TECHNOLOGIES: AWS, CassandraDB, MongoDB, Jenkins, PostgreSQL, Docker, SQL Server, ActiveMQ, MariaDB, Chef, RabbitMQ, Ansible, Bitbucket, JIRA, Confluence, Git, Python, OpenVPN, Java, Groovy, Rake, Ruby, NodeJS, Troposphere, JavaScript, Bootstrap.JS, Centos 7, Windows, SpringBoot

SENIOR DEVOPS & SOFTWARE ENGINEER

SCHIBSTED - STOCKHOLM DEC 2015 - NOV 2016

Schibsted Classified Media (SCM) is an international media group with 6800 employees in 30 countries that is a leading business worldwide in online classifieds. Tripwell Sweden AB a sister company decided to move all its on-premise platforms (QA and Production environments) to the cloud, and AWS had been chosen as the cloud provider with Kalilou help. The project was about moving all on premise to AWS in conjunction of setting up CI/CD.

Kalilou joined the project as a DevOps and backend engineer and was responsible for designing a scalable, reliable, resilient and secure cloud infrastructure in conjunction with estimating the total cost of AWS resources bill prior to the migration. Kalilou was also responsible for provisioning and maintaining the AWS resources and setting up the CI/CD environments, VPN, SSL/TLS, local RPM repo, local Pypi server and so on in an automated manner(IaC). Kalilou was also responsible for documenting and conducting workshops and through this process, conveyed his knowledge to the rest of the team.

Tripwell did not have a reliable Server Configuration Management which was a fundamental component required for provisioning the servers correctly. Kalilou got the responsibility to set up a CHEF server, writing and testing all the CHEF components (Cookbooks, databags, recipes and so on) which was later used to provision the new QA, build and Stage environments in the Vsphere. Furthermore, Kalilou was responsible for setting up CloudFormation (Infrastructure as Code) to correctly provision all AWS resources. Kalilou has also used CHEF and CloudFormation to perform a quick test of the Tripwell platform on AWS by making sure some of the cloud benefits are taken by the application such as Scalability, Operational cost- OPEX, Resiliency and cloud security. During this project, Kalilou was also responsible for some major upgrades (from Centos 6 to Centos 7 and from PostgreSQL from 9.2 to 9.5)

TECHNOLOGIES: AWS, Chef, Ansible, Jenkins, NGINX, PostgreSQL, Fabric.io, OpenVPN, Git, GitHub, LetsEncrypt, CouchDB, Python, Ruby, Node.js, Solr, JIRA, Confluence, Stash, New Relic, Celery, Redis, Vagrant, CentOS, VMware, Pulp.

BACKEND DEVELOPER

SCHIBSTED - STOCKHOLM MAR 2013 - DEC 2015

Schibsted Classified Media (SCM) is an international media group with 6800 employees in 30 countries that is a leading business worldwide in online classifieds. SCM started working on a project called Tripwell Sweden AB. Kalilou joined SCM when Tripwell Sweden AB was not yet an official organization on its own. The project was about to implement the core functionalities and launch the beta version.

Kalilou as a backend engineer was responsible for designing and implementing the Tripwell main product. Since Tripwell was still at the beta version, Kalilou mainly worked on all components from backend to frontend. Kalilou implemented third-party integration such as Trustly payment solution, Zendesk, SMS provider Twilio, Transifex, Blocket and so on. Kalilou has worked intensively on the core of the backend such as database design and implementation, email and sms notification, translations (Internationalization and localization), Search Engine, Integration and performance testing, code review, planning, workshops.

With Kalilou's help, Tripwell beta completion was a success and Kalilou helped Tripwell ongoing with the main product development lifecycle.

TECHNOLOGIES: CouchDB, Redis, Pyramid Web Framework, PostgreSQL, Python, Celery, Solr, Bootstrap, Rake, JavaScript, Jinja2, RequireJS, Git, functional tests, Centos 6/7, Stash, Rackspace, VMware Vsphere, Crucible, JIRA, Twilio, Zendesk, Mixpanel, Transifex, Google Analytics.

CO-FOUNDER/FULLSTACK DEVELOPER

EDUTECH - STOCKHOLM JUL 2012 - NOV 2012

Edutech was a startup intending to facilitate the real time interactions between, and amongst, teachers and students. Kalilou as fullstack developer and tech lead was responsible for the platform architecture, database design and implementation. Kalilou was also responsible for the application stack and was involved in the mobile development.

With Kalilou's help, Edutech successfully implemented a prototype, which was later used in the pitch presented to investors.

TECHNOLOGIES: NoSQL, JSP, Google datastore, Android, Java, Google app engine, Eclipse, Cloud, Android SDK.

ADSL ANALYST

SOTELMA - BAMAKO AUG 2010 - SEP 2010

Sotelma is a private telecommunications company in Mali. The company is based in Bamako. Sotelma provides local telephony, international telephony, internet service and mobile telephone service, etc. Its mobile service subsidiary is Malitel. It is also the official registry of the ml country code domain.

Kalilou was responsible for analyzing ADSL network, Protocols, and architecture as well as analysing the different constraints on the implementations and installation problems. With Kalilou's help, Sotelma has now a better and more efficient process of installing and configuration ADSL technology at the client.

Kalilou was responsible for analyzing ADSL network, Protocols, and architecture as well as analysing the different constraints on the implementations and installation problems. With Kalilou's help, Sotelma has now a better and more efficient process of installing and configuration ADSL technology at the client.

TECHNOLOGIES: ADSL network, Point-to-Point over Ethernet (PPPoE), Point-to-Point Protocol over ATM (PPPoA), TCP/IP, ADSL Protocols, ADSL architecture, OSI Model, Asynchronous Transfer Mode (ATM)

AWARDS

2015 Schibsted Hackathon winner

2012 The Swedish Institute Scholarship for my master in Information System Management at Stockholm University

2011 Malian Education Minister Scholarship for my exchange study in Stockholm University

2007 Moroccan scholarship for my university studies in Morocco
